

Global Gateway

#GLOBALGATEWAY #TEAMEUROPE

DECEMBER 2021

- Our world depends on people, economies and countries being connected to one another. Global Gateway is Europe's strategy to better connect the world. We will support smart, sustainable investments in quality infrastructure, in line with the EU's values and standards. We will promote equal partnerships, and forge new alliances, without creating dependencies.

PRESIDENT OF THE EUROPEAN COMMISSION, **URSULA VON DER LEYEN**

Global Gateway is Europe's **offer for connecting the world** with **investments** and **partnerships**. Countries need investment to create jobs, skills and better living conditions for people. And to tackle the biggest global challenges - climate change, global health security, sustainable development, stronger supply chains.

Europe will provide a positive choice for countries who need that investment. A choice that comes with a trusted brand and **builds links between partners** – rather than creating dependencies.

Global Gateway will mobilise up to 300 billion euros by 2027 for developing global infrastructure and supporting **the green and digital transitions** around the world.

Key guiding principles for investments

Promoting democratic values and high standards

Green and clean infrastructures

Good governance and transparency

Equal partnerships

Security focused

Catalyse private sector investment

5 investment priorities

Global Gateway will focus on five main sectors

Digital.

The EU will support open and secure internet

Climate and energy.

The EU will support investments and rules paving the way to the clean energy transition

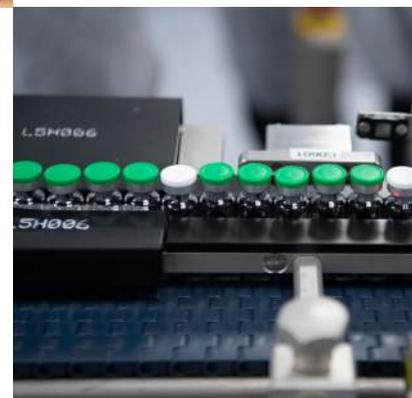

Transport.

The EU will support all modes of green, smart and safe transport

Health.

The EU will help strengthen supply chains and local vaccines production

Education and Research.

The EU will invest in high quality education, with a special focus on girls and women and vulnerable groups

€300 billion

Global Gateway will mobilise up to €300 billion in investments in global infrastructure between 2021 and 2027. In a Team Europe approach we will work with Member States, European financial institutions and the private sector to leverage investments.

Key principles of the Global Gateway approach

Democratic values and high standards

Global Gateway is a value-based model. This means, investments in line with the rule of law, human rights and international norms.

Good governance and transparency

Global Gateway delivers transparency and sustainability of projects. We deliver what we promise.

Equal Partnerships

Global Gateway projects will be developed with partners. They will meet their needs and opportunities, as well as EU's strategic interests.

Green and clean

Global Gateway is our strategy to support our partners speed up their green transition and move to a circular economy.

Security focused

Global Gateway projects will be safe and resilient to natural or man-made disasters, cyber and hybrid threats.

Catalyze private sector

Global Gateway will attract investment involving Europe's leading industry, private sector knowledge and investment capacity.

Governance

- Global Gateway will be under the overall steer of President von der Leyen.
- Global Gateway projects will be developed through Team Europe Initiatives.
- EU Delegations will have a key role in identifying projects with partners.
- A Business Advisory Group will be set up to give input from the private sector.
- A dialogue with civil society will also be set up to ensure their participation.
- Global Gateway will be a priority for discussion in upcoming international Summits and multilateral fora.
